Double Glazing + Grey Tint

| Comparative Data    |                     |
|---------------------|---------------------|
| Heat Gain Reduction | Shading Improvement |
|                     |                     |
| 38%                 | 38%                 |
| 38%                 | 38%                 |
| 24%                 | 25%                 |
| 60%                 | 61%                 |

Note: thicker tints will provide more shading, and may be required for wind loads in certain areas
